2026 ANNUAL TEACHING PLANS: ENGLISH MATHEMATICS: GRADE 4 (TERM 1)

TERM 1	WEEK 1	WEEK 2	WEEK 3	WEEK 4	WEEK 5	WEEK 6	WEEK 7	WEEK 8	WEEK 9	WEEK 10	WEEK 11
HOURS PER TOPIC	9		6	18			3	15		4	6
TOPICS, CONCEPTS AND SKILLS	**Revision of Grade 3 work (to be integrated into the topics accordingly)** **WHOLE NUMBERS** **Number range for counting, ordering, comparing and representing, as well as place value of digits** • Count forwards and backwards in 2s, 3s, 5s, 10s, 25s, 50s, 100s between 0 and at least 10 000 • Order, compare and represent numbers to at least four-digit numbers • Represent odd and even numbers to at least 1 000. • Recognise the place value of digits in whole numbers to at least four-digit numbers • Round off to the nearest 10, 100 and 1 000		**NUMBER SENTENCES** • Write number sentences to describe problem situations • Solve and complete number sentences by: – Inspection – Trial and improvement – Checking the solution by substitution **Properties of whole numbers** • Recognize and use the commutative, associative and distributive properties of operations with whole numbers • 0 in terms of its additive property	**WHOLE NUMBERS: ADDITION AND SUBTRACTION** **Number range for calculations** • Addition and subtraction of whole numbers of at least 4-digits **Calculation techniques** • Use **any two** techniques to perform and check written and mental calculations of whole numbers including: – Estimation – Building up and breaking down numbers – Using a number line – Rounding off and compensating – Using addition and subtraction as inverse operations **Note: Ensure that the strategies used do not compromise conceptual understanding**			**FORMAL ASSESSMENT TASK** **ASSIGNMENT** • Whole numbers: *Counting, ordering and representing numbers* • Number sentences • Whole numbers: *Addition and subtraction* **Note: Assignment to be completed in class within three hours**	**WHOLE NUMBERS: MULTIPLICATION** **Number range for calculations** • Multiplication of one-digit numbers by numbers up to 10 • Multiplication of at least a two-digit number by a one-digit number • Multiplication of at least a whole two-digit number by two-digit numbers **Calculation techniques** • **Use any two** techniques to perform and check written and mental calculations of whole numbers including: – Estimation – Building up and breaking down numbers – Doubling and halving – Using multiplication and division as inverse operations **Note: Ensure that the strategies used do not compromise conceptual understanding**		**REVISION**	**FORMAL ASSESSMENT TASK** **TEST: All topics**

			Solving problems • Solve problems involving whole numbers, including the following: — Financial contexts — Measurement contexts		**Number range for multiples and factors** • Multiples of one-digit numbers to at least 100 • Factors of one-digit whole numbers to at least 10 • Factors of two-digit whole numbers to at least 100 **Solving problems** • Solve problems involving whole numbers, including: – Financial contexts – Measurement contexts – Comparing two or more quantities of the same kind (ratio) – Comparing two quantities of different kinds (rate)		
PREREQUISITE SKILL OR PRE-KNOWLEDGE	• Counting ordering, comparing and representing the place value of three-digit numbers up to 800 • Recognise the place value of digits in whole numbers to at least three-digit numbers up to 800 • Round off to the nearest 10	• Multiply 2, 3, 4, 5 and 10 to at least 100 • Divide numbers to 100 by 2, 3, 4, 5 and 10 • Use of appropriate symbols $(+, -, \times, \div, =)$	• Counting, ordering, comparing and representing the place value of three-digit numbers up to 800 • Add up to 800 • Subtract from 800 • Recognise the place value of digits in whole numbers to at least 800 • Round off to the nearest 10, 100 and 1 000 • Adding and subtracting units, multiples of 10 and multiples of 100 to/from any three-digit number up to 800		• Multiply 2, 3, 4, 5 and 10 to at least 100 • Multiply 1 by one-digit whole numbers • Halving and doubling • Multiplication facts for units by multiples of 10 and 100 • Building up and breaking down three-digit whole numbers. • Round off to the nearest 10 and estimate answers

2026 ANNUAL TEACHING PLANS: ENGLISH MATHEMATICS: GRADE 4 (TERM 2)

TERM 1	3	WEEK 1	WEEK 2	WEEK 3	WEEK 4	WEEK 5	WEEK 6	WEEK 7	WEEK 8	WEEK 9	WEEK 10	WEEK 11	WEEK 12
HOURS PER TOPIC		15			6		9	12		9		9	
TOPICS, CONCEPTS AND SKILLS	FORMAL ASSESSMENT TASK INVESTIGATION Note: Administer an investigation on any ONE of the Term 2 topics before teaching it	**WHOLE NUMBERS: DIVISION** **Number range for calculations** • Division of at least a two-digit number by a one-digit number • Division of at least a whole three-digit number by one-digit numbers **Calculation techniques** • Use **any two** of the range of techniques to perform and check written and mental calculations with whole numbers including: – Estimation – Building up and breaking down numbers – Using multiplication and division as inverse operations **Note: Ensure that the strategies used do not compromise conceptual understanding**			**GEOMETRIC PATTERNS:** **Investigate and extend patterns** • Investigate and extend geometric patterns looking for relationships or rules of patterns: – in sequences not limited to a constant difference or ratio – of the learners' own creation • Describe observed relationships or rules in learners' own words **Input and output values** Determine input values, output values and rules for the patterns and relationships using flow diagrams		**NUMERIC PATTERNS:** **Investigate and extend patterns** • Investigate and extend numeric patterns looking for relationships or rules of patterns – sequences involving a constant difference or ratio – of learner's own creation • Describe observed relationships or rules for sequences involving constant difference or ratio in learners' own words	**PROPERTIES OF 2D SHAPES:** **Range of shapes** • Recognise, visualise and name 2-D shapes in the environment and geometric setting, focusing on regular and irregular polygons: – Triangles – Squares – Rectangles – Other quadrilaterals – Pentagons – Hexagons – Heptagons • Recognise, visualise and name 2-D shapes in the environment and geometric setting, focusing on circles		**PROPERTIES OF 3D OBJECTS:** **Range of objects** • Recognize, visualize and name 3-D objects in the environment and geometric settings, focusing on: – rectangular prisms, – spheres – cylinders – pyramids **characteristics of objects** • Describe, sort and compare 3-D objects in terms of – shapes of faces – flat and curved surfaces **Further activities** • Make 3-D models using cut out polygons		REVISION ASSESSMENT TASK **TEST: All Term 1 & 2 topics**	

		Solving problems • Solve problems in contexts involving whole numbers, including: – Financial contexts – Measurement contexts – Comparing two or more quantities of the same kind (ratio) – Comparing two quantities of different kinds (rate) – Grouping and equal sharing with remainders	**Equivalent forms** • Determine equivalence of different descriptions of the same relationship or rule presented in the following ways: – Verbally – In a flow diagram – By a number sentence	**Input and output values** • Determine input values, output values and rules for patterns and relationships: – Flow diagrams – Tables **Equivalent forms** • Determine the equivalence of different descriptions of the same relationship or rule presented in the following ways: – Verbally – In a flow diagram – In a table – By a number sentence	**Characteristics of shapes** • Describe, sort and compare 2-D shapes in terms of the following: – Straight and curved sides – Number of sides **Further activities** • Draw 2-D shapes on grid paper **SYMMETRY** Recognize, draw and describe line(s) of symmetry in 2-D shapes		
PREREQUISITE SKILL OR PRE-KNOWLEDGE		• Divide numbers to 100 by 2, 3, 4, 5 and 10 • Halving and doubling • Building up and breaking down three-digit whole numbers • Use multiplication and division as inverse operations • Round off to the nearest 10 and estimate answers	• Investigate and extend patterns • Describe patterns in own words	• Investigate and extend patterns • Describe patterns in own words	• Identify circles, triangles, squares and rectangles • Describe, sort and compare 2D shapes in terms of the following: ○ Shape ○ Straight sides ○ Round sides	• Recognise and name 3-D objects in the classroom and in pictures – ball shapes (spheres) – box shapes (prisms) – cylinders

2026 ANNUAL TEACHING PLANS: ENGLISH MATHEMATICS: GRADE 4 (TERM 3)

TERM 1		WEEK 1	WEEK 2	WEEK 3	WEEK 4	WEEK 5	WEEK 6	WEEK 7	WEEK 8	WEEK 9	WEEK 10
HOURS PER TOPIC		9			14			6	6	6	3
TOPICS, CONCEPTS AND SKILLS	FORMAL ASSESSMENT TASK PROJECT Note: The project must cover a combination of topics from Term 1 to 3 and must be completed before the end of Term 3	**COMMON FRACTIONS** **Describing and ordering fractions** • Compare and order common fractions with different denominators (halves, thirds, quarters, fifths, sixths, sevenths and eighths) • Describe and compare common fractions in diagram form **Calculations with fractions** • Recognise, describe and use the equivalence of division and fractions • Addition of common fractions with same denominators. **Solving problems** • Solve problems in contexts involving fractions, including grouping and equal sharing **Equivalent forms** • Recognise and use equivalent forms of common fractions (denominators which are multiples of one another)			**DATA CYCLE** **Collecting and organising data** • Collect data using tally marks and tables for recording **Representing data** • Draw a variety of graphs to display and interpret data including: – pictographs (one-to-one correspondence) data and representation) – bar graphs **Interpreting data** • Critically read and interpret data represented in – words – pictographs – bar graphs – pie charts **Analysing data** • Analyse data by answering questions related to data categories			**MASS** **Practical measuring** • Estimate and practically measure 3D objects using measuring instruments such as the following: – bathroom scales – kitchen scales and – balances • Record, compare and order the mass in grams (g) and kilograms (kg); **Calculations and problem-solving** • Solve problems in contexts involving mass • Convert between grams and kilograms limited to examples with whole numbers and fractions	**TRANSFORMATIONS** **Build composite shapes** Put 2-D shapes together to make different composite 2-D shapes including some shapes with line symmetry. **Tessellations** Pack out 2-D shapes to make tessellated patterns including some patterns with line symmetry. **Describe patterns** • Refer to lines, 2-D shapes, 3-D objects and lines of symmetry when describing patterns – in nature – from modern everyday life – our cultural heritage	REVISION FORMAL ASSESSMENT TASKS **TEST: All Term 3 topics**	

			Reporting data • Summarise data verbally and in short written paragraphs making predictions based on the data **PROBABILITY** **Probability experiments** • Perform simple repeated events and list possible outcomes for experiments such as: – tossing a coin – rolling a die			
PREREQUISITE SKILL OR PRE-KNOWLEDGE		• Use and name unitary and non-unitary fractions in familiar contexts including halves, quarters, eighths, thirds, sixths and fifths • Recognise fractions in diagrammatic form • Recognise that two halves or three thirds make one whole and that one half and two quarters are equivalent • Write fractions as one half, two thirds	• Collect data about the class or school to answer questions posed by the teacher • Organise data supplied by teacher or workbook/textbook • Organise data in lists, tally marks and tables • Represent data in – pictograph (limited to pictographs with one-to-one correspondence) – bar graphs • Answer questions about data presented in — pictographs (limited to pictographs with one-to-one correspondence) • bar graphs	• Estimate, measure, compare, order and record mass • Compare, order and record the mass of commercially packaged objects	Recognise and draw line of symmetry in 2-D geometrical and non-geometrical shapes

REPUBLIC OF SOUTH AFRICA

2026 ANNUAL TEACHING PLANS: ENGLISH MATHEMATICS: GRADE 4 (TERM 4)

TERM 1	WEEK 1	WEEK 2	WEEK 3	WEEK 4	WEEK 5	WEEK 6	WEEK 7	WEEK 8	WEEK 9	WEEK 10
HOURS PER TOPIC	12			6	6	6	21			
TOPICS, CONCEPTS AND SKILLS	**TIME** **Reading time and time instruments** • Read, tell and write time in 12-hour and 24-hour formats on both analogue and digital instruments in the following: – Hours – Minutes – Seconds • Instruments include clocks watches and stopwatches **Reading calendars** **Calculations and problem solving with regard to time include the following:** • Solve problems in contexts involving time • Calculation of the number of days between any two dates within the same or consecutive years • calculation of time intervals where time is given in: – seconds and/or minutes – minutes and/or hours – hours and/or days – days, weeks and/or months – years and/or decades			**LENGTH** **Practical measuring** • Estimate and practically measure 2D shapes and 3D objects using measuring instruments such as the following: – Rulers – Metre sticks – Tape measures – Trundle wheels • Record, compare and order lengths of shapes and objects in millimetres (mm) and centimetres (cm), metres (m) and kilometres (km) **Solving problems** • Solve problems in contexts involving length • Convert between the following: – Millimetres (mm) and centimetres (cm) – Centimetres (cm) and metres (m) – Metres (m) and kilometres (km) • Conversions limited to whole numbers and common fractions	**PERIMETER, AREA AND VOLUME** • Measure perimeter using rulers or measuring tapes **Measurement of area** • Find areas of regular and irregular shapes by counting squares on grids in order to develop an understanding of square units **Measurement of volume** • Find volume/ capacity of objects by packing or filling them in order to develop an understanding of cubic units	**CAPACITY/VOLUME** **Practical measuring** • Estimate and practically measure 3D objects using measuring instruments such as the following: – Measuring spoons – Measuring cups – Measuring jugs • Record, compare and order the capacity and volume of 3D objects in millilitres (ml) and litres (ℓ) **Calculations and problem-solving** • Solve problems in contexts involving capacity/volume • Convert between millilitres and litres (limited to examples with whole numbers and fractions)	**REVISION** **FORMAL ASSESSMENT TASK** **TEST: Tem 1- 4 topics**			

PREREQUISITE SKILL OR PRE-KNOWLEDGE	• Read dates on calendars
	• Place birthdays, religious festivals, public holidays, historical events and school events on a calendar
	• Use calendars to calculate and describe lengths of time in days or weeks or months, including the following:
	  ○ Converting between days and weeks
	  ○ Converting between weeks and months
	• Use clocks to calculate length of time in hours, half hours and quarters of an hour
		• Estimate, measure, compare, order and record length using non-standard measures, e.g. hand spans, paces, pencil lengths, counters, etc.
		• Describe the length of objects by counting and stating the length in informal units
			• Solve problems in contexts involving length
			• Convert between the following:
			  – Millimetres (mm) and centimetres (cm)
			  – Centimetres (cm) and metres (m)
			  – Metres (m) and kilometres (km)
				• Estimate, measure, compare, order and record the capacity of objects by measuring in litres, half litres and quarter litres
				• Describe the volume on jugs where the volume is near to a numbered millilitre gradation line using almost/ nearly/close to/a bit more than/more or less than/exactly the number of litres read on the jug
