2026 ANNUAL TEACHING PLANS: ENGLISH MATHEMATICS: GRADE 5 (TERM 1)

TERM 1	WEEK 1	WEEK 2	WEEK 3	WEEK 4	WEEK 5	WEEK 6	WEEK 7	WEEK 8	WEEK 9	WEEK 10	WEEK 11
HOURS PER TOPIC	9		6	18			3	15		4	6
TOPICS, CONCEPTS AND SKILLS	**Revision of Grade 4 work (to be integrated into the topics accordingly)** **WHOLE NUMBERS** **Number range for counting, ordering, comparing and representing, and place value of digits** • Order, compare and represent numbers to at least 6-digit numbers • Recognise the place value of digits in whole numbers to at least 6-digit numbers • Round off to the nearest 5, 10, 100 and 1 000		**NUMBER SENTENCES** • Write number sentences to describe problem situations • Solve and complete number sentences by: — Inspection — Trial and improvement — Checking the solution by substitution **Properties of whole numbers** • Recognize and use the commutative, associative and distributive properties of operations with whole numbers — 0 in terms of its additive property — 1 in terms of its multiplicative property	**WHOLE NUMBERS: ADDITION AND SUBTRACTION** **Number range for calculations** • Addition and subtraction of whole numbers of at least 5-digits **Calculation techniques** • Use **any two** techniques to perform and check written and mental calculations of whole numbers including: — Estimation — Adding and subtracting in columns — Building up and breaking down numbers — Using a number line — Rounding off and compensating — Using addition and subtraction as inverse operations			**FORMAL ASSESSMENT TASK** **ASSIGNMENT** • Whole numbers: *Counting, ordering and representing numbers* • Number sentences • Whole numbers: *Addition and subtraction* **Note: Assignment to be completed in class within three hours**	**WHOLE NUMBERS: MULTIPLICATION** **Number range for calculations** • Multiplication of at least whole 3-digit by 2-digit numbers **Calculation techniques** • **Use any two** techniques to perform and check written and mental calculations of whole numbers including: — Estimation — Building up and breaking down numbers — Doubling and halving — Using multiplication and division as inverse operations **Note: Ensure that the strategies used do not compromise conceptual understanding** **Number range for multiples and factors** • Multiples of 2-digits whole numbers to at least 100 • Factors of 2-digit whole numbers to at least 100			**REVISION**	**FORMAL ASSESSMENT TASK** **TEST: All topics**

			Note: Ensure that the strategies used do not compromise conceptual understanding **Solving problems** • Solve problems involving whole numbers, including: — Financial contexts — Measurement contexts		**Solving problems** • Solve problems involving whole numbers, including: — Financial contexts — Measurement contexts — Comparing two or more quantities of the same kind (ratio) — Comparing two quantities of different kinds (rate)		
PREREQUISITE SKILL OR PRE-KNOWLEDGE	• Counting ordering, comparing, and representing place value of 4-digit numbers • Recognise the place value of digits in whole numbers to at least 4-digit numbers • Rounding off to the nearest 100	• Multiply 2, 3, 4, 5 and 10 to at least 100 • Divide numbers to 100 by 2, 3, 4, 5 and 10 • Use of appropriate symbols (+, −, ×, ÷, =)	• Addition and subtraction of 4-digit numbers • Round off to the nearest 10, 100, 1 000 and estimate answers • Adding and subtracting units, multiples of 10 and multiples of 100, 1 000 to/from any 4-digit number		• Multiply at least and 2-digit by 2-digit numbers • Doubling and halving • Multiplication facts for units by multiples of 10, 100 and 1 000 • Building up and breaking down 4-digit whole numbers • Round off to the nearest 10, 100 and 1 000 to estimate answers • Multiples of 1-digit numbers to at least 100 • 1 in terms of its multiplicative property

2026 ANNUAL TEACHING PLANS: ENGLISH MATHEMATICS: GRADE 5 (TERM 2)

TERM 2	3	WEEK 1	WEEK 2	WEEK 3	WEEK 4	WEEK 5	WEEK 6	WEEK 7	WEEK 8	WEEK 9	WEEK 10	WEEK 11	WEEK 12
HOURS PER TOPIC		12			9		6	9		12		9	
TOPICS, CONCEPTS AND SKILLS	FORMAL ASSESSMENT TASK INVESTIGATION Note: Administer an investigation on any ONE of the Term 2 topics before teaching it	WHOLE NUMBERS: DIVISION Number range for calculations • Division of at least whole 3-digit by 2-digit numbers Calculation techniques • Use **any two** of the range of techniques to perform and check written and mental calculations with whole numbers including: – Estimation – Building up and breaking down numbers – Using multiplication and division as inverse operations **Note: Ensure that the strategies used do not compromise conceptual understanding**			COMMON FRACTIONS Describing and ordering fractions: • Count forwards and backwards in fractions • Compare and order common fractions to at least twelfths Calculations with fractions: • Addition and subtraction of common fractions with the same denominators • Addition and subtraction of mixed numbers • Fractions of whole numbers which result in whole numbers • Recognize, describe and use the equivalence of division and fractions		GEOMETRIC PATTERNS: Investigate and extend patterns • Investigate and extend geometric patterns looking for relationships or rules of patterns: – in sequences not limited to a constant difference or ratio – of learner's own creation • Describe observed relationships or rules in learner's own words Input and output values Determine input values, output values and rules for the patterns and relationships using flow diagrams	NUMERIC PATTERNS: INVESTIGATE AND EXTEND PATTERNS • Investigate and extend numeric patterns looking for relationships or rules of patterns — sequences involving a constant difference or ratio — of learner's own creation • Describe observed relationships or rules for sequences involving constant difference or ratio in learners' own words Input and output values Determine input values, output values and rules for patterns and relationships: • Flow diagrams • Tables		PROPERTIES OF 2D SHAPES: RANGE OF SHAPES • Recognise, visualise and name 2D shapes in the environment and geometric setting, focusing on – regular and irregular polygons: :triangles, squares, rectangles, other quadrilaterals, pentagons, hexagons, heptagons – Circles • Recognise, visualise and name 2D shapes in the environment and geometric setting, focusing on circles		REVISION ASSESSMENT TASK TEST: All Term 1 and 2 topics	

		Solving problems • Solve problems in contexts involving whole numbers, including: – Financial contexts – Measurement contexts – Comparing two or more quantities of the same kind (ratio) – Comparing two quantities of different kinds (rate) – Grouping and equal sharing with remainders	**Solving problems** Solve problems in contexts involving common fractions, including grouping and sharing **Equivalent forms**: • Recognize and use equivalent forms of common fractions (fractions in	**Equivalent forms** • Determine equivalence of different descriptions of the same relationship or rule presented: – Verbally – In a flow diagram – By a number sentence	**Equivalent forms** • Determine the equivalence of different descriptions of the same relationship or rule presented in the following ways: – Verbally – In a flow diagram – In a table – By a number sentence	**Characteristics of shapes** • Describe, sort and compare 2D shapes in terms of the following: – Straight and curved sides – Number of sides **Further activities** Draw 2D shapes on grid paper **SYMMETRY** Recognize, draw and describe line(s) of symmetry in 2-D shapes	
PREREQUISITE SKILL OR PRE-KNOWLEDGE		• Division of 3-digit numbers by 1-digit numbers • Solve problems in financial and measurement contexts with whole numbers including sharing, grouping and rate • Multiples of 2-digit numbers to at least 100 • Factors of 2-digit whole numbers to at least 100 • 1 in terms of its multiplicative property	• Describe, compare and order common fractions of different denominators (halves, thirds, quarters, fifths, sixths, sevenths, eighths) fractions in diagram form • Equivalent fractions • Adding fractions in context	• Investigate and extend patterns • Describe patterns in own words		• Identify circles, triangles, squares and rectangles • Describe, sort and compare 2D shapes in terms of the following: — Shape — Straight sides — Round sides

2026 ANNUAL TEACHING PLANS: ENGLISH MATHEMATICS: GRADE 5 (TERM 3)

TERM 3		WEEK 1	WEEK 2	WEEK 3	WEEK 4	WEEK 5	WEEK 6	WEEK 7	WEEK 8	WEEK 9	WEEK 10
HOURS PER TOPIC		9		14			6	9		3	6	3
TOPICS, CONCEPTS AND SKILLS	FORMAL ASSESSMENT TASK PROJECT Note: The project must cover a combination of topics from Term 1 to 3 and must be completed before the end of Term 3	**PROPERTIES OF 3D OBJECTS: RANGE OF OBJECTS** • Recognize, visualize and name 3-D objects in the environment and geometric settings, focusing on: — rectangular prisms and other prisms — cubes — cylinders — cones — pyramids • similarities and differences between cubes and rectangular prisms **Characteristics of objects** • Describe, sort and compare 3-D objects in terms of: — shape of faces — number of faces — flat and curved surfaces		**DATA CYCLE** **Collecting and organising data** • Collect data using tally marks and tables for recording • Order data from smallest group to largest group **Representing data** • Draw a variety of graphs to display and interpret data including: — pictographs (many-to-one correspondence) data and representation) — bar graphs **Interpreting data** • Critically read and interpret data represented in — words — pictographs — bar graphs — pie charts			**LENGTH** **Practical measuring of 2-D shapes and 3-D objects by** • Estimate and practically measure 2D shapes and 3D objects using measuring instruments such as the following: — Rulers — Metre sticks — Tape measures — Trundle wheels • Record, compare and order lengths of shapes and objects in millimetres (mm) and centimetres (cm), metres (m) and kilometres (km)	**PERIMETER, AREA AND VOLUME** • Measure perimeter using rulers or measuring tapes **Measurement of area** • Find areas of regular and irregular shapes by counting squares on grids in order to develop an understanding of square units **Measurement of volume** Find volume/ capacity of objects by packing or filling them in order to develop an understanding of cubic units		**REVISION** **FORMAL ASSESSMENT TASK** **TEST:** **All Term 3 topics**		

		Further activities • Make 3-D models using cut out polygons • Cut open boxes to trace and describe their nets	**Analysing data** • Analyse data by answering questions related to — data categories — data sources and contexts **Reporting data** • Summarise data verbally and in short written paragraphs that include — drawing conclusions about the data — making predictions based on the data **Ungrouped data** • Examine ungrouped numerical data to determine the most frequently occurring score in the data set (mode) **PROBABILITY** **Probability experiments** • Perform simple repeated events and list possible outcomes for experiments such as: — tossing a coin — rolling a die — spinning a spinner • Count and compare the frequency of actual outcomes for a series of trials up to 20 trials	**Calculations and problem-solving involving length** • Solve problems in contexts involving length • Convert between the following: — Millimetres (mm) — centimetres (cm) — metres (m) — kilometres (km) • Conversions limited to whole numbers and common fractions		
PREREQUISITE SKILL OR PRE-KNOWLEDGE		• Recognise, visualise and name:rectangular prisms, spheres, cylinders and pyramids	• Collect data using tally marks and tables for recording • Draw a variety of graphs to display and interpret data including pictographs (one-	• Estimate and practically measure 2D shapes and 3D objects using measuring instruments such as rulers,	• Measure perimeter using rulers or measuring tapes • Find areas of regular and	

		• Describe, sort and compare 3D objects in terms of: – Shapes of faces – Flat and curved surfaces • Make 3D models using cut-out polygons	to-one correspondence between data and representation), bar graphs • Critically read and interpret data represented in words, pictographs, bar graphs, pie charts • Analyse data by answering questions related to data categories • Summarise data verbally and in short written paragraphs Perform simple repeated events and list possible outcomes for experiments such as tossing a coin and rolling a die	metre sticks, tape measures and trundle wheels • Record, compare and order lengths of shapes and objects between consecutive units • Solving problems • Solve problems in contexts involving length • Convert between the consecutive units • Conversions limited to whole numbers and common fractions	irregular shapes by counting squares on grids in order to develop an understanding of square units

2026 ANNUAL TEACHING PLANS: ENGLISH MATHEMATICS: GRADE 5 (TERM 4)

TERM 4	WEEK 1	WEEK 2	WEEK 3	WEEK 4	WEEK 5	WEEK 6	WEEK 7	WEEK 8	WEEK 9	WEEK 10
HOURS PER TOPIC	12			6	6	6	21			
TOPICS, CONCEPTS AND SKILLS	**TIME** **Reading time and time instruments** • Read, tell and write time in 12-hour and 24-hour formats on both analogue and digital instruments in the following: — Hours — Minutes — Seconds • Instruments include clocks watches and stopwatches **Reading calendars**			**CAPACITY/VOLUME** **Practical measuring** • Estimate and practically measure 3D objects using measuring instruments such as the following: — Measuring spoons — Measuring cups — Measuring jugs • Record, compare and order the capacity and volume of 3D objects in millilitres (ml) and litres (ℓ) **Calculations and problem-solving** • Solve problems in contexts involving capacity/volume • Convert between millilitres and litres (limited to examples with whole numbers and fractions)	**MASS** **Practical measuring** • Estimate and practically measure 3D objects using measuring instruments such as the following: — bathroom scales — kitchen scales and — balances • Record, compare and order the mass in grams (g) and kilograms (kg); **Calculations and problem-solving** • Solve problems in contexts involving mass • Convert between grams and kilograms limited to examples with whole numbers and fractions	**TRANSFORMATION** **Use transformations to make composite shapes** • Make composite 2-D shapes including shapes with line symmetry by tracing and moving a 2-D shape in one or more of the following ways: — by rotation — by translation — by reflection • **Use transformations to make tessellations** • Make tessellated patterns including some patterns with line symmetry by tracing and moving 2-D shapes in one or more of the following ways — by rotation — by translation — by reflection	**REVISION** **FORMAL ASSESSMENT TASK** **TEST: Term 1- 4 topics**			

	Calculations and problem solving with regard to time include the following: • Solve problems in contexts involving time • Calculation of the number of days between any two dates within the same or consecutive years • calculation of time intervals where time is given in: — seconds and/or minutes — minutes and/or hours — hours and/or days — days, weeks and/or months — years and/or decades			**Describe patterns** • Refer to lines, 2-D shapes, 3-D objects, lines of symmetry, rotations, reflections and translations when describing patterns — in nature — from modern everyday life — from our cultural heritage	
PREREQUISITE SKILL OR PRE-KNOWLEDGE	• Read, tell and write time in 12-hour and 24-hour • formats on both analogue and digital instruments in hours, minutes and seconds • Calculation of the number of days between any two dates within the same or consecutive years • Calculation of time intervals where time is given in minutes or hours only • Reading calendars	• Estimate, measure, compare, order and record length using non-standard measures, e.g. hand spans, paces, pencil lengths, counters, etc. • Describe the length of objects by counting and stating the length in informal units	• Practical measurement and estimation using bathroom scale, kitchen scale and balance. • Measuring units (g and kg) converting between grams and kilograms limited to examples with whole numbers and fractions	• Put 2-D shapes together to make different composite 2-D shapes including some shapes with line symmetry. • Pack out 2-D shapes to make tessellated patterns including some patterns with line symmetry. • describing patterns in nature, from modern everyday life and our cultural heritage with reference to lines of symmetry, 2-D shapes, 3-D objects
